

Frequently asked questions about pressure washing

Q: I'm hesitant about pressure washing because I've heard it can cause damage. Is that true?

A: Yes, it certainly is true. That's why you should be careful about trusting your home to just anyone. Waynick Pressure Washing & Roof Cleaning has six years of successful experience, certification by the Power Washers of North America (PWNA), accreditation by the Greensboro BBB, and many references from happy customers.

Q: Do you use dangerous chemicals? I don't want my children, pets and landscaping to be harmed.

A: Responsible use of the proper chemicals is one thing that distinguishes professional pressure washing companies from the others. We use only the most up-to-date, damage free and biodegradable chemical cleaners, of the proper type and concentration for each job. They are 100% safe for plants and animals.

Q: Are you certified, licensed, bonded and insured?

A: Yes, Waynick Pressure washing is certified by (PWNA) and our company carries all the requisite licensing and insurance to do business in Greensboro and North Carolina.

Q: Why can't I rent a pressure washer and do it myself?

A: You could, but you might do irreparable damage, and could never achieve the results you really want. You don't need just one machine but several expensive machines to do all kinds of jobs. Add to this a range of different chemicals and the knowledge of their proper concentration and application. Most importantly, you need years of training and experience to properly use the equipment and chemicals to get a whole variety of surfaces and stains clean without doing damage. In addition, wouldn't you really rather be doing something else?

Q: Is your work guaranteed?

A: Yes, we give up to a three-year warranty on all of our work. We are only able to do this because we are meticulous and thorough in every phase of every job, and have the experience to do it right the first time.
